### **Water Main Replacement Project Continues**

Beginning Monday August 12, work will begin on Vulcan, S. Douglas, N. Baylor, and N. Park streets as a continuation of a water main replacement project. There will be occasional detours required in various areas of the work zones but proper signage will be displayed and flaggers will be directing traffic to ensure resident safety.

If water shutoff is required in any of the work areas, those affected will be given proper notification in advance.

We thank you, in advance, for your patience with our crews and work zones.

If you have any questions or concerns, please feel free to call Public Utilities at 979-337-7400
